

A very rare George III Sugar Crusher made in London in 1808 by Thomas Phipps & Edward Robinson.

Sold

REF: 374967

Description

This piece has a plain tubular section with reeded girdle and plain crushing plate at the end. The other end is beautifully modelled with a cast section, with incuse supports, pierced to simulate a flower head. The crusher is of an outstanding gauge and weight and is in excellent condition. This piece is fully marked on the central shaft and crushing end. Length: 5 inches. Diameter of the pierced end: 1.1 inches.
